The
AGA COOKER
sets a new standard
in **ECONOMY**

Burning day and night the normal fuel consumption is 1 1/2 TONS per ANNUM. The stove requires stoking only once in 24 hours, but is always ready for cooking. The hot spots and ovens are automatically regulated to remain at the correct cooking temperatures.

Reliability is absolute

BELLS GUARANTEE THE ACCURACY OF THESE CLAIMS and confidently invite your personal investigation at the Ideal Home Exhibition, Stand No. 105, Ground Floor.

Fixed in a Few Minutes for a Few Shillings.

Of all Stores, Electricians & Ironmongers.

Or Wholesale only from the General Electric Co. (1900) Ltd., 71, Queen Victoria St., London, E.C.

General Electric "Geeko" telephone, London (top) the AGA Cooker - Bells Asbestos Eng Ltd

No Mechanical Knowledge is Required

to run the Aster Lighting Plant successfully. It is so simple and automatic in action that the gardener, the chauffeur, the coachman, or even the handyman, can give it the very slight attention which is necessary.

The Aster Way is the cheapest and most satisfactory method of Country House Electric Lighting. The light is brilliant, convenient, clean, and very cheaply produced.

"Country House Electric Lighting," an explanatory booklet, sent post free on request to Dept "B."

Historic England is the public body that looks after England's historic environment. It champions historic places, helping people care them, now and in the future. You may sign up to our Newsletter to keep up to date with our latest news, advice and listings.

www.historicengland.org.uk

Twitter:[@HistoricEngland](https://twitter.com/HistoricEngland)

The Building Services and Emergency Planning Team provide advice on how historic property owners, managers and custodians can reuse, replace or refurbish their building services and improve energy efficiency and control energy use as well as advise on health and safety, security management, fire engineering and emergency planning.

**Historic England and the Building Services & Emergency Planning Team
are the sponsors of the CIBSE Heritage Group 2020 Calendar.**

The CIBSE Heritage Group is made up of a number of like minded professionals, many retired, who have spent a lifetime in building services and bring that experience to bear in discovering, analysing and recording the history of this essential aspect of the world we live in. It is the oldest CIBSE Special Interest Group (1973).

The Heritage website is a substantial resource for historians but also for working architects, designers and engineers amongst many others, particularly those involved in historic projects including building engineering services with which they may not be familiar. By using the website and/or by reference to Heritage Group members, answers may be found to questions which could otherwise add considerably to the time and thus cost of the project.
