The Comfort Makers

BRIAN ROBERTS
CIBSE HERITAGE GROUP
2013
Introductory Note

The Comfort Makers was conceived, researched and written in the late 1990s and published by ASHRAE (American Society of Heating, Refrigerating and Air Conditioning Engineers, Inc) in 2000 [ISBN 1-883413-84-2].

Now, some thirteen years later, the author has put together a modified electronic version to make the information on industry pioneers available to a wider audience through the CIBSE Heritage Group website. In addition, two Appendices have been added: Pioneers in Acoustics and The Electric Motor Makers. The original summary follows.
The Story of the Heating Engineers

How elementary heating was developed into an industry which provides sophisticated mechanical services in buildings
CONTENTS

Foreword

Introduction

The HEAT MAKERS ......................................................... 1

The VENTILATORS ......................................................... 21

The COLD MAKERS ......................................................... 33

The AIR CONDITIONERS .................................................. 43

The COMFORT CONTROLLERS ......................................... 55

The COMFORT PIONEERS ............................................... 63

Some COMFORT ARCHITECTS ........................................ 81

The COMFORT DESIGNERS ............................................ 93

The COMFORT INSTALLERS ........................................... 103

The COMFORT ORGANIZATIONS ..................................... 111

Index of Biographical Entries ........................................ 127

Bibliography ............................................................. 135

Appendices

[1] PIONEERS IN ACOUSTICS

[2] The ELECTRIC MOTOR MAKERS
