FENLON'S HOT-WATER APPARATUS FOR BURNING GAS.

The only Reliable, Economical, and Safe Boiler in the World.

GREAT HEAT. NO SMOKE. NO SMELL. NO BACK DRAUGHT.

No. 130.

For Warming Greenhouses, Conservatories, Offices, Halls, Bed-rooms, Harness-rooms, Motor and Carriage Houses, Garages, Small Places of Worship, etc.

Our Specialities are a class by themselves.

Boilers are made any way to suit purchaser, or to take the place of existing boilers.

Complete Catalogue on application.

Particulars of the famous "Temple" Gas Boiler, GD Heating Apparatus and other specialities on application.

The above is made of coated Rolled-Steel Plates with Copper Boiler, Pipe and Bobbin Tubes into a Reservoir above. The action of our system is as follows—The heat strikes on the bottom of the boiler, round the sides, over the top into the Heating Tube or Elbow, thus utilizing the whole of our Heating Power and destroying all the offensive smell which is so objectionable and impractical in other makers' stoves, also making it the most Economical Stove ever introduced.
