1890

CAMERON & ROBERTON,

Architectural, Pipe, & General Ironfounders,

SOUTH BANK IRON WORKS, KIRKINTILLOCH,

NEAR GLASGOW.

Speciality—**SANITARY CASTINGS.**

**CAST-IRON DRAIN PIPES, specially smooth inside,
INSPECTION or ACCESS PIPES,
DISCONNECTING CHANNELS, TRAPS, &c.,**

Being the latest developments and improvements devised by the leading Sanitary Engineers, to meet the requirements of Mansions, Houses, Villas, Hospitals, Asylums, and all Public Buildings.

**ALL THE SIZES OF MEDIUM AND HEAVY SOIL PIPES, AND ALL
DRAIN PIPES ARE INTERNAL DIAMETER.**

In order to meet the wishes of Architects and Sanitary Engineers, and to prevent misunderstandings in carrying out specifications, weights are given for the various sizes of Pipes. This affords the fullest opportunity for ascertaining that what has been specified is being used in carrying out the work.

**All Drain and Soil Pipes bear the Firm's Trade Mark—
MONOGRAM IN STAR.**

Illustrated Catalogue will be sent on Application.

**RAIN-WATER PIPES, GUTTERS AND CONNECTIONS.
HOT-WATER HEATING APPARATUS.**

FLUE PIPES UP TO 10" DIAMETER.

GAS, WATER, & STEAM PIPES.

LIGHT CASTINGS GENERALLY.

1891

FOSSIL-MEAL COMPOSITION

IS THE BEST NON-CONDUCTING COVERING

For Boilers, Steam Pipes, Cylinders, &c., to prevent
loss of heat and the influence of cold.

The advantages of our Fossil-Meal Composition as compared with
formerly-used Compositions, are:—

1. THE GREATER EFFICIENCY.
2. THE LOW SPECIFIC GRAVITY (0.3).
3. THE SMALL THICKNESS REQUIRED.

ONE INCH THICKNESS.

Is of greater efficiency than about double the thickness of any
other non-conducting Cement.

DOES NOT SMELL.

1891

CANNOT DETERIORATE.
