The NATIONAL COLLEGE for
HEATING, VENTILATING, REFRIGERATION
and FAN ENGINEERING

1950
NEW HEAD of COLLEGE
N. S. Billington is New National College Head

As we were about to close for press, the Governors of the National College for Heating, Ventilating, Refrigeration and Fan Engineering announced the appointment of Mr. Neville Samuel Billington, M.Sc., A.M.I.H.V.E., as the new Head. Mr. D. G. Lewis, M.I.H.V.E., resigned from that post some time ago owing to ill-health.

Mr. Billington, who is 33, was educated at the County Secondary School, Crewe, and the Victoria University, Manchester. Since leaving the University in 1937, he has been a physicist at the Building Research Station, Watford, and is now a principal scientific officer at the station. For the whole of his professional career, therefore, he has been concerned with research work in connection with heating and ventilating problems, and he has contributed a number of research papers to the journals of the Institution of Heating and Ventilating Engineers and the Royal Institute of British Architects.

He is a member of two committees of the I.H.V.E. and has served on a number of B.S.I. committees dealing with the subjects of interest to the industry.
Mr. N. S. Billington, M.Sc., A.M.I.H.V.E., whose appointment as the new head of the National College for Heating, Ventilating, Refrigeration and Fan Engineering we reported on page 316 last December, took up his duties in London on Monday, February 13th. He is seen at his desk in the photograph above.
